

Hojae Lee

Seoul, South Korea

✉ iceanon1@gmail.com | 🌐 <https://scholar.google.com/citations?user=o2RGCNQAAAAJ&hl=en> | 💼 <https://www.linkedin.com/in/lee-ho-jae-247b29266/> | [hjl777.github.io](https://github.com/hjl777)

Healthcare AI researcher with a rigorous mathematical foundation (B.S. Mathematics, Korea University) focused on two problems where errors carry clinical consequences: automated coronary vessel analysis and LLM reliability in structured medical knowledge. 25 SCI/SCIE publications (6 co-first, 1 corresponding, 404 citations, h-index 12) within two years. Seeking a PhD research environment to pursue these problems at depth — Fall 2027.

EDUCATION

M.S. — Computational Health & Biomedical Data Science (School of Pharmacy, Kyung Hee University)
Mar. 2023 – Feb. 2025

Thesis: “Development of A Machine Learning-Based Prediction Algorithm for Suicidal Ideation in Adolescents and Independent Validation Across Three Worldwide Cohorts”

Advisor: Professor Sang Youl Rhee & DongKeon Yon

B.S. Korea University, South Korea
Major: Mathematics

Mar. 2016 – Feb. 2023

FELLOWSHIPS & VISITING APPOINTMENTS

Ministry of Science and ICT (MSIT/IITP) National Fellowship

University of Toronto, Dept. of Mechanical & Industrial Engineering | Jan 2024 – Jul 2024

Fully funded government fellowship for applied AI research; collaborated with MIT research team on LLM hallucination mitigation in scientific Q&A.

PROFESSIONAL & RESEARCH EXPERIENCE

PUBLICATIONS

*Co-first author; †Corresponding author.

HONORS/AWARDS/GRANTS/SCHOLARSHIPS

HONORS/AWARDS

- Best Paper Award, The 5th Engineering in Biomedical and Rehabilitation & Home Conference, Japan Jun. 2023

GRANTS/SCHOLARSHIPS

- AI Convergence Innovation Project Competition, Kyung Hee University **May. 2023 – Dec. 2023**
Thesis: Development of an Early Prediction and Personalized Health Management Platform for Chronic Diseases Using AI and Wearable Technology
- Academic Scholarship, Kyung Hee University **2024 Spring Semester**
- Academic Scholarship, Kyung Hee University **2023 Fall Semester**
- Academic Scholarship, Kyung Hee University **2023 Spring Semester**
- Awarded a fellowship by the Ministry of Science and ICT(IITP), South Korea **Dec. 2023 – Jun. 2024**

PROFESSIONAL EXPERIENCES

- **Researcher**, Asan Medical Center, Biomedical Engineering Research Center **Mar. 2025 – Feb. 2026**
Building **quantitative coronary angiography analysis pipelines** with **clinician QA interfaces**, improving measurement consistency and reviewer efficiency.

Prototyping **3D vascular geometry reconstruction from routine 2D angiographic sequences** for **interventional planning contexts**.

Developing **semi-automated instrument (catheter/wire) tracking** in angiographic videos using **foundation-model–assisted segmentation**.

Integrating **structured clinical variables** with model outputs to produce **clinician-facing explanations and summaries** for decision support.

Independent AI Research (DEFINES Project)

Seoul, South Korea | Feb 2026 – Present

- Extending prior LLM hallucination mitigation work (MIT/UofT, 2024) from text-based scientific Q&A to multimodal mathematical reasoning — investigating symbolic-neural hybrid architectures for constraining VLM outputs in structured knowledge domains.
- Designed 4-stage multi-agent pipeline: YOLOv8 document parsing → VLM formula extraction (Gemini 2.5 Flash via OpenRouter) → Neo4j knowledge graph alignment (Korean math curriculum ontology) → automated evaluation.
- Implemented knowledge constraint via PostgreSQL-Neo4j synchronization to suppress domain hallucination without fine-tuning.
- Established math-domain evaluation metrics (Normalized Levenshtein Distance, Character Error Rate) on ground-truth formula dataset.

- **M.S. in Pharmacy Researcher**, *Center for Digital Health Medical Science Research Institute*

Jan. 2023 – Feb. 2025

Developed and externally validated ML risk models for neurodegenerative, cardiovascular, and diabetic retinopathy outcomes in T2D across two **independent Korean cohorts** (JMIR 2024; Sci Rep 2024), standardizing the end-to-end pipeline (data curation → feature engineering → model benchmarking → **calibration**/external validation) with **clinician-interpretable** outputs.

Led **nationwide time-series analyses** of adolescent health behaviors in Korea (2005–2022/ 2009–2022), quantifying trends and policy impacts (tax hikes, COVID-19).

Contributed to population-level studies on allergic rhinitis/rhinosinusitis and hypertension (1998–2021), and to multi-country/meta-analytic projects (long COVID dermatologic events, mpox kinetics, autoimmune hepatitis).

Publications: 25 SCI/SCIE publications | 6 co-first author | 1 corresponding author | 404 citations | h-index 12 | Full list: scholar.google.com/citations?user=o2RGCNQAAAAJ&hl=en; established reproducible, code-first reporting (Python/R), automated tables/figures, and mentored junior analysts.

- **Internship**, *MEDIAZEN*

Jun. 2021 – Jan. 2022

Engineered text dataset preprocessing pipelines and generated structured training data (Python) for a commercial Korean-language chatbot system.

EXTRACURRICULAR ACTIVITIES

LAB TECHNIQUES

- Languages: Korean (native); English (professional working proficiency; **TOEFL iBT 94 (R24 L22 S23 W25, Nov. 2024)**)
- Data analysis of hospital data, survey data, and diabetic retina image dataset
- Factor analysis of cohort study

- Fine-tune pretrained LLMs; build small LLMs (sLLM) pipelines
- Programming: Python, R, MATLAB, C, JavaScript | SQL
- ML/DL: PyTorch, TensorFlow, scikit-learn | Interpretability (SHAP), calibration, time-series, survival/mixed models
- Imaging/Clinical: QCA (seg/centerline/bifurcation), SAM 2 for catheter tracking, clinical data modeling
- Tools: Git, Docker, Linux, Jupyter, SAS

ADDITIONAL EXPERIENCES

- CURT Program KUS University's Innovation Business Department
Prediction of Korea fine dust data using LSTM & GRU models **Apr. 2021 – Jul. 2022**
- Military Service in South Korea
Social Service Personnel at Seoul Metro **Nov. 2018 – Sep. 2020**
Certificate of Commendation
- Family Education Team Mentoring Service Volunteer
Gangnam-gu Family Support Center (113 hours) **Jul. 2017 – Sep. 2018**
